

1)CREATE AN HTML FILE BY APPLYING DIFFERENT STYLES USING INTERNAL STYLE SHEET

2)CREATE AN HTML PAGE TO CHSNGE THE BACKGROUND COLOR OF EVERY BUTTON USING JAVASCRIPT
EVENT HANDLING

3)CREATE A PHP TO STORE INDIAN CRICKET PLAYERS AND DISPLAY THEM IN HTML TABLE

The screenshot shows a web browser window with the address bar displaying 'localhost/php/Cricket.php'. The browser has several tabs open, including 'localhost / localh...', 'github login - Br...', 'webprogramz202...', 'localhost / localh...', 'localhost/php/in...', 'php program for...', and 'localhost/php/Cr...'. The main content area displays a table titled 'Players' with 10 rows, each containing the name of an Indian cricket player.

Players
Kohli
Ganguly
Dravid
Sachin
Kumble
Dhawan
Jadeja
Bumrah
Sharma
Chahal
